No repairs shall be undertaken or commenced under this warranty programme without WS's prior approval. WS reserves the right to examine the vehicle and subject to independent assesment. The result of the assesment will determine WS's liability. You must follow our correct claims procedures, else WS will not pay for your claims.

5. REPAIRS ON VEHICLE

Warranty repairs will be made entirely at the discretion on Warranty Smart Sdn.Bhd. who reserves the right to either repair / recondition faulty components or to replace damaged components with used / reconditioned parts.

WS will replace the faulty component only when the part is deemed to be found irreparable. Otherwise, WS will opt to restore the affected part to a condition that is safe and acceptable by industry standards. Should no reconditioned or used component is available upon exhausting sourcing out in the market, the settlement amount would be based on the rateable percentage (%) of depreciation to determine the betterment rate to be deducted from the cost of the original new component.

If you have any intention of replacing damaged covered parts with brand new original parts, it should be communicated to WS or Authorised Claims Panel before commencement of any approved claim job. *Such replacement is only possible if you agree to top up any difference between the cost of a new part and that of the claim approval amount.*

Warranty Smart will only be able to provide estimated repair times. There are many factors of a vehicle repair job which may cause unforeseen delays such as availability of replacement parts, actual vehicle condition upon accessing the damages, shop schedules etc. Warranty Smart will be able to provide estimated turnaround times for repairs and services but cannot guarantee exact time.

Vehicle owner is obligated to repair the faulty component, regardless the repair is fully claimable within warranty coverage or not. Refusal to do so may render the warranty coverage being automatically voided. WS reserves the right to refuse any warranty coverage directly or indirectly, related to the same type of repair in any subsequent claims.
